

THE NEW GENERATION OF ROLLATORS!

Increased safety, flexibility and the best possible comfort

The TOPRO Troja Classic revolutionised the rollator market in 2002. Since then the TOPRO product development team has developed a rollator based on research and feedback from users and therapists. The result is a 2nd generation TOPRO Troja with several user friendly features and a strong focus on increased security, flexibility and comfort.

TOPRO TROJA 2G PREMIUM

INNOVATIVE!

Maximising user friendliness with various new functions

1 TOPRO IBS

A new developed interior braking system, which brakes on the rim instead of the surface of the wheel. This makes it possible to offer different tyres with a variety of tread patterns for different foundations.

2 TOPRO Quick Release

Easy to exchange or take off the wheels.

3 Comfort Wheels Soft (PUR)

Comfortable and secure on unsurfaced roads, cobblestones etc.

4 TOPRO Off-road Wheels or Studded Tyres

For rugged terrain or icy roads (accessories).

5 TOPRO Ergo Grip

Unique ergonomic grip that makes it easier to stand from a sitting position. Provides a comfortable armrest and offers different holding positions when standing and resting.

6 TOPRO Bell

Attract attention when necessary. Easy to use without having to take your hands off the handles.

7 TOPRO Shopping Bag

Holds up to 10 kg and is detachable. It includes a shoulder strap for easy handling. The shopping bag has two pockets inside for small personal belongings and a lid to protect your items.

8 Reflective Panels

Be visible from all sides in the dark with the reflective panels and the reflective band on the bag.

In addition are the original features kept:

- Lightweight.
- Memory function for easy height adjustment of the handles.
- Tilt function and edge guard for safe and easy manoeuvring.
- A total of 12 ball bearings in the wheels and forks provide excellent driving comfort.
- Easy to fold.
- Stays firmly on its wheels when folded and takes little space.
- Tested and approved according to NS-EN ISO 11199-2 (rollator standard).
- Biocompatibility tested according to EN ISO 10993-5.

The experts say this about the new handle TOPRO Ergo Grip:

Yasko Hupfauer
Physiotherapist at the University and rehabilitation clinic in Ulm, Germany

"Patients with reduced mobility and painful hands can hold the rollator with ease. The user walks WITHIN the rollator, not behind and the material of the grip is comfortable and provides good grip. By placing your hands on the top flat part of the Ergo Grip you will achieve an equilibrium reaction in the body."

Fabian Crüwell
Physiotherapist and therapy manager at Special Hospital Neresheim, Germany

"It gives a number of grip options. The grip requires more tension in the upper body, which is good for the patient. Rising up is easier, because you can support yourself better with this grip."

Nora Kern
NOI and Bobath instructor, Germany

"Sitting on the walker is more comfortable, since the arms can easily rest on the Ergo Grip."
